- ▣ Winner: 2010's Best Dressed *Canadian* Agency Award for outfitting Royal Newfoundland Constabulary

The Uniforms of the **Future**

have Arrived...

The **future** is **wiser**:

Wickability

Image-Oriented

EGC: Hidden Weapon

Retention and Repellency

Retention of Color:

Did you know: The life of an average garment is 50 washes?

Retention (Cont'd)

- *Throughout* the life of that garment, color will fade. Perfection uses H2UltraDye, which provides superior color depth and retention (versus conventional or vat dye process).

- The dye is actually pushed *through* the fibers instead of merely staining the outside of the threads. Your uniform will *look newer, longer*.

S-t-r-e-t-c-h Engineered

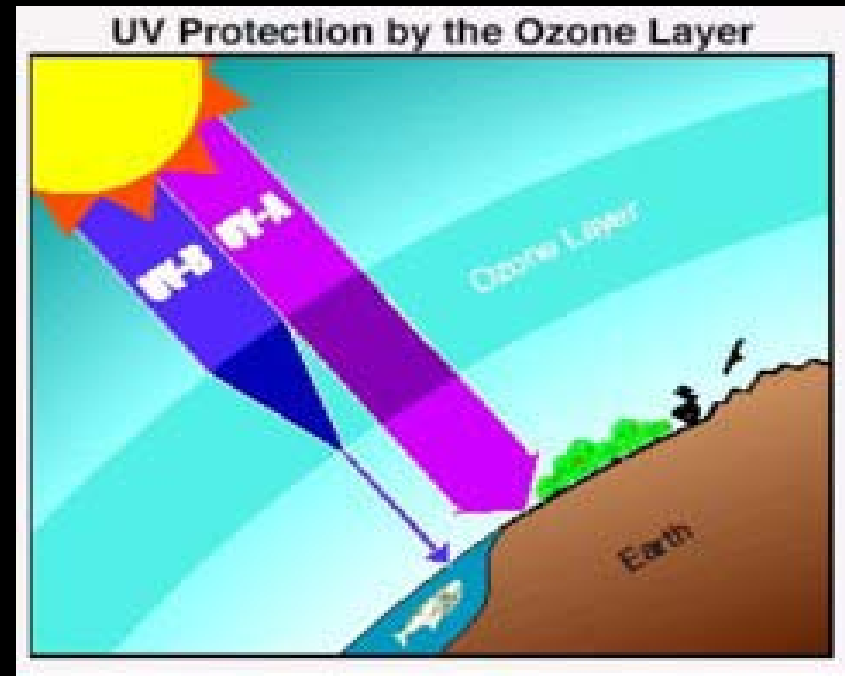

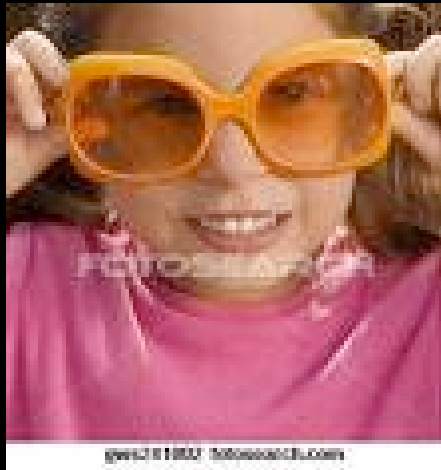

- ▣ H2Flex provides enhanced comfort through engineered stretch, for ease of motion...

...and the garment is *guaranteed* to retain its shape!

Repellency from the Sun

- UPF 40+ Rating for UV Sun Protection is the highest standard for apparel...

...which is why we incorporate it into our garments.

Moisture Repellency...

- ▣ With H2Tech, the fabrics repel liquids on the surface...

...*And Wickability*

- ▣ ...while wicking moisture *away* from your skin on the opposite side!

The Perfection **E**G C System:

Your Hidden Weapon

EGC: Ergonomic Garment Construction

- ▣ Expandable trouser waistband adjusts 2-4" upon demand, moving *with* you instead of *against* you

- ▣ Hidden gussets in shirts and trousers

- ▣ Discreet, heavy-duty (yet breathable) waistband helps you to support your gear

EGC: Hidden Gussets in Shirts & Trousers

- ▣ Ease of tailoring (run a dart through side panel of shirt)
- ▣ Extends your range of motion
- ▣ More comfortable

EGC: Expandable Waistband

- ▣ Again, more comfortable!
- ▣ Great for layering without having “bulk”
- ▣ Allows for weight fluctuation

EGC: Heavy-duty, yet Breathable Waistband

- ▣ Engineered stretch, but robust enough to *retain* its shape
- ▣ Helps to evenly distribute & support the weight of duty belt
- ▣ Breathable and comfortable

Image-Oriented

- ▣ Creaset® silicone creases in shirts and pants give a *just-ironed* appearance even at the end of a long shift...

- ▣ ...and unlike sewn in creases, silicone resists puckering.

- ▣ ...And now, with the use of **REPREVE®** recycled polyester in our poly/cotton **MatrixEcoSeries** and **PinnacleEcoSeries** line, we are also...

...Eco-Responsible.

“Why?”

- ▣ Because **REPREEVE recycled polyester** is made from reclaimed plastic bottles, it **diverts** trash from landfills. Approximately four to five 16 oz. plastic bottles can be **made** into one Perfection shirt or trouser.
- ▣ Because these uniforms do not require virgin polyester, the manufacturing process expends less **energy**. Every pound of REPREEVE yarn actually **conserves** the equivalent of half a gallon of gasoline, which means every Perfection garment **saves** almost a quart of gasoline.

The Real Question:

Not only is it the **responsible** use of taxpayer dollars, quite simply, it's the right thing to do...

(PRE)**SERVE & PROTECT.**

For more information about REPREVE®, please visit www.repreve.com

REPREVE is a trademark of Unifi, Inc. and is registered with the U.S. Patent and Trademark Office and with others.

*What Else Does the **Future** Hold?*

Perfection. ■
